Dix Hills Water District Mutual Aid Plan

1. The dispatcher will receive a call from the Dix Hills Water District. The dispatcher is to find out the problem zone.
2. If the problem is located in another fire district, the dispatcher will call the respective dispatcher and then activate the alarm as per our procedure.
3. The dispatcher will activate a signal 23 (General Fire and Rescue) for all members to respond to their respective houses.
4. The IC will relay any location information to the dispatcher. Any relevant information will be relayed to the appropriate units.
5. The IC will find out all the involved streets.
6. The IC will give each company a number of streets to announce the following message from their apparatus “DO NOT DRINK OR USE THE TAP WATER.” The Town of Huntington Highway Department will work with the department.
7. The IC will establish a command post at a central location and keep constant communication with all units and the dispatcher.
8. The following units will be used:

Company One	***Company Two***	***Company Three***
2-8-14	**2-8-4**	**2-8-7**
2-8-15	**2-8-5**	**2-8-25**
